EDUCATION

CDGI Indore

Master of Computer Applications (MCA), Computer Science

Indore, MP

Expected 2027

Renaissance University

Bachelor of Computer Applications (BCA), Computer Science

Indore, MP

2025

EXPERIENCE

Software Developer Intern

Oct 2024 – Dec 2024

Unizztech

- Built and optimized React-based web applications using Redux and REST APIs, improving performance through lazy loading and efficient state management
- Collaborated in Agile teams to develop reusable components and enhance UI responsiveness, making the frontend faster and more maintainable

PROJECTS

TaskFlow | *FastAPI, PostgreSQL, Redis, Docker Compose, Pytest*

[GitHub](#) | [Live](#)

- Architected a production-ready task management REST API with 17 endpoints, using stateless JWT authentication and role-based access control (leader/user) enforced at the route level
- Integrated Redis for session caching and token blacklisting, enabling instant token revocation and fewer repeated database lookups; designed a normalized, indexed PostgreSQL schema
- Containerized the API, database, and cache with Docker Compose for one-command setup, and validated auth and task workflows with Pytest integration tests across core routes

Devora | *Arch Linux, Archiso, GNOME, Bash*

[GitHub](#) | [Live](#)

- Developed and maintain a custom Arch-based Linux distribution, building a bootable live ISO with archiso and a pre-configured GNOME desktop that is ready to use after install
- Automated installation with Bash scripts, eliminating manual configuration steps and reducing setup to a few guided steps for end users
- Curated packages and system defaults to balance usability with performance while keeping Arch's flexibility; published publicly with a live download page

Campus Connection | *Next.js, MongoDB, NextAuth, WebSockets, Firebase*

[GitHub](#) | [Live](#)

- Led end-to-end development of a full-stack campus networking platform with authentication, real-time messaging, and media sharing
- Secured sessions with NextAuth (JWT, HTTP-only cookies) to guard against token theft, and implemented WebSocket-based chat for low-latency, two-way messaging
- Optimized MongoDB with targeted indexing to speed up frequent queries, and integrated Firebase for seamless image and file sharing

TECHNICAL SKILLS

Backend: Python, FastAPI, Node.js, Express.js, Golang

Frontend: JavaScript, React, Redux, Next.js, Tailwind CSS

Databases: PostgreSQL, MySQL, MongoDB, Redis

Tools & Systems: C, C++, Git, GitHub, Linux, Docker, POSIX

COURSEWORK & ACHIEVEMENTS

Coursework: Introduction to RISC-V (Linux Foundation), Computer Architecture, Data Structures & Algorithms, DBMS, Computer Networks, Operating Systems, Software Engineering, Linear Algebra

Achievements: 4th rank in CDGI competitive programming contest; solved 370+ LeetCode problems

Interests: Calisthenics, Chess
